GENERAL INDEX

The general index includes references to all the reading matter that has appeared in the pages of THE JOURNAL for the past six months. Use of the index will be facilitated by bearing in mind that subjects are frequently given under two or more headings; for example, brain, cerebral, tumor, etc.; heart and cardiac; cirrhosis, liver, hepatic, etc. Often, too, writers treat of the eye, ear, nose and throat under one title. There is no longer a department index such as used to follow the general index, but all the "Deaths" are together at the end of the letter "D." Similarly, all societies are under the heading of "Societies" at the end of the letter "S." All matter pertaining to the American Medical Association is placed together under "Association News." All books are listed under "Book Notices." The following letters are used to indicate the nature of the matter referred to: "E" indicates editorial, "O" original article, "T" therapeutic item, "Ml" an item in the medicolegal department, and "ab" an abstract of an article that has appeared in full elsewhere. The titles and the authors of the articles which are listed each week as having been published in other journals are given under the Current Medical Literature Index on pages 2076 to 2118.

CURRENT MEDICAL LITERATURE

INDEX OF TITLES

Explanation: This index includes the titles and the subjects of original articles published in the leading medical journals of the world during the past six months. The titles and the names of the journals in which they appeared were published weekly in the Current Medical Literature Department, to which references are made. The figures in parentheses refer to the paragraph; the number following, to the page in THE JOURNAL. For instance, "Abdomen, firearm wounds of the, (84) 437—ab," refers to page 437 of THE JOURNAL, on which is found opposite paragraph 84 the title of the paper and the name of the author, viz.: "Firearm Wounds of the Abdomen, B. K. Finkelstein." This title is listed under the journal in which the article appeared, "Rousskii Vratch, St. Petersburg, ii, No. 39." The "ab" indicates that an abstract of the article appeared in THE JOURNAL, which will be found below the title. Titles of articles which appeared in THE JOURNAL are indicated in the index below by an asterisk (*) before the page number. Index to authors of all the articles below is on pages 2105 to 2118 of this index. The reading matter which appeared in THE JOURNAL is indexed in the General Index on pages 2057 to 2075.
